

# **HKUSTx:** ELEC1200.2x A System View of Communications: From Signals to...

- Pre-course Materials
- ▶ Topic 1: Course Overview
- ▶ Topic 2: Lossless Source Coding: Hamming Codes
- ▶ Topic 3: The Frequency Domain
- ▶ Topic 4: Lossy **Source Coding**
- ▶ Topic 5: Filters and the Frequency Response
- ▶ Topic 6: The Discrete Fourier Transform
- ▶ Topic 7: Signal Transmission -Modulation
- ▶ Topic 8: Signal Transmission -Demodulation
- ▶ Topic 9: IQ

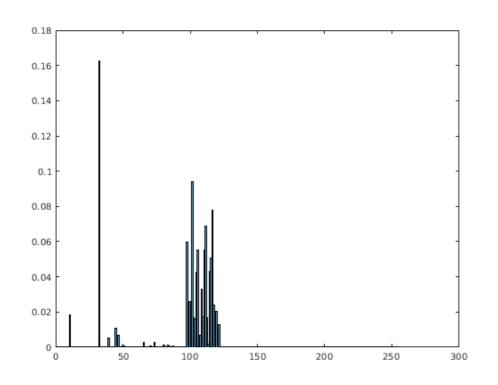

## GENERIC MATLAB SANDBOX

Here is a blank script for you to build your own communication system. This is an optional task and will not be graded. You can try to call any functions introduced by previously expired lab tasks.

```
1% read the text file (1 byte for each character)
 2 fid = fopen('G4jHRdGpVaY.txt');
 3 text_code = fread(fid,inf,'uchar');
 4 fclose(fid);
 6 % % % % Revise the following code % % % %
7 N = 10;
8% get the histogram
9 code_words =[0:1:255];
10 hist = histogram(text_code,code_words,'Normalization','probabili
11 prob = hist.Values;
12 % sort the histogram
13 [values, id_codes] = sort(prob, 'descend');
14
15 display(['Probability covered by the first ' num2str(N) ' charac >
```

### Correct

# Figure 1

Generic MATLAB Sandbox | MATLAB Sandbox | ELEC1200.2x Courseware | edX

## Modulation

▶ Topic 10: Summary and Review

Probability covered by the first 10 characters: 0.70886 Most likely characters: " etoanisrh" Size of ASCII encoding: 79632 Size of Huffman encoding: 54648 The sent and the received messages are the same.
